

## Xseed Environmental Policy

Xseed Landscape Maintenance Ltd believes that looking after our environment is an absolute priority both for this generation and the generations to come. We therefore actively implement this environmental policy into our everyday activities. We believe that wherever possible it is our responsibility to prevent pollution and so consciously try to limit our impact in this area via well scheduled operations, safeguarding the environment and taking positive steps to minimise the environmental impacts of our business. We aim to comply with all applicable legislation at all times, abiding by current regulations and industry codes of practice whilst implement good codes of practice right down to the simple changes we've made like only using very clean burning 'Green' STIHL HP Super oil in our machines, greatly reducing pollutant emissions.

Xseed Landscape Maintenance Ltd will at all times:

- Operate within all relevant Environmental Legislation Standards and Codes of Practice.
- Efficiently use all forms of fuel energy and water, optimising our use of natural resources.
- Consult with clients and neighbours alike to ensure that our activities cause minimum disruption to all concerned.
- Actively support and promote the recycling of all green waste.
- Responsibly manage and minimise any waste going to landfill through recorded forms of recycling.
- Encourage modes of transport, which minimise environmental impact, ensure that our staff are aware of the Governments Green Transport Plan, of fuel efficient driving and with this in mind, regularly examine the operation and emissions of our vehicles.
- Regularly review all of our environmental commitments to ensure our continuous improvement as well as identifying and implementing new codes of best practice.

Xseed Landscape Maintenance Ltd is registered with the Environment Agency and is licensed as both an environmentally responsible upper tier Dealer, Broker and Carrier of waste.
